

**Key Science Positions in Queensland Department of Environment and  
Resource Management**

**(applications close 13 January, 2011)**

The Water Quality and Aquatic Ecosystem Health branch of the Qld Department of Environment and Resource Management (DERM) is recruiting 2 key environmental scientists to the Ecosciences Precinct in Brisbane, Australia (PO5 level; Principal Scientist and Principal Environmental Officer).

The Principal Scientist will lead investigations relating to toxicology, water quality and aquatic ecosystem health and undertake monitoring and evidence collection to support environmental litigation.

The Principal Environmental Officer will coordinate DERM's role in the Ecosystem Health Monitoring Program (EHMP) for South East Queensland and lead the department's marine and estuarine component of this program.

Further details about these positions can be found on the Queensland Government's "Smart jobs and careers" website: <https://smartjobs.qld.gov.au/jobtools/jncustomsearch.searchResults> The closing date for both positions is **13 January 2012**.

If you require any further information please contact Dr Michael Warne and Dr Michael Holmes for the Principal Scientist and Principal Environmental Officer positions, respectively.
