

FOLLOW OUR GOOD NAME!

Welcome to the SCC: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical industry, and, for more than 140 experts from different countries, a professional home. Our passion: managing registration and approval procedures for chemicals such as agrochemicals, pesticides, biocides, etc. Our goal: to grow even further, in an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise as

ECOTOXICOLOGIST (M/F/D) - REGULATORY AFFAIRS

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a team of currently 23 people – and right into our enormous diversity of projects
- Your task: assessment of ecotoxicological properties of various substances mainly in the field of biocides
- Your mission: in collaboration with your colleagues you will plan/coordinate studies, evaluate ecotoxicological studies including potential endocrine related effects, prepare exposure and risk assessments, as well as submission dossiers, and engage in various regulatory projects
- Your focus: to obtain approvals/authorisations for our client's active substances/biocidal products in the European and global markets

WHAT WE OFFER

- Opportunities for personal development
- Intensive on-the-job training and flexible working hours
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work (not currently because of the corona pandemic)

WHAT YOU OFFER

- Science degree in natural sciences (e.g. ecotoxicology, biology, biochemistry or environmental sciences)
- At least 5 years' experience in ecotoxicology (e.g. as a study director/study monitor/dossier writing) with experience in regulatory setting (ideally in the field of biocides)
- Ideally additional qualification as a certified expert in ecotoxicology and experience in the assessment of endocrine disruptor properties of substances
- Ability to tackle and coordinate complex issues effectively
- A talent for organisation, goal orientation and awareness of timelines
- Strong communication and presentation skills in English, excellent German command is an essential asset
