

We offer a challenging role at a leading European consultancy firm for the chemical industry. The special attraction: Duties with an international dimension. Interdisciplinary cooperation. Project diversity and scope. At a dynamic and successful company that has built up an outstanding reputation in the industry and with national and EU authorities. You can expect excellent conditions, firm opportunities for promotion and long-term prospects.

Demand for consultancy in Europe is huge. Our expertise is increasingly sought after. We are continuing to grow. For this reason, at our **Berlin** site, we are looking for an

Manager Regulatory Affairs – Toxicologist (m/f)

Your duties

As a specialist in your field, you will assess toxicological properties of various substances mainly in the fields of plant protection and pharmaceuticals (pre-clinical phase) in collaboration with your colleagues. You will prepare risk assessments, evaluate potential endocrine effects, plan/coordinate studies and assist various regulatory projects. In this context, you will play a key role in preparing registration dossiers for our international clients with a clear objective: authorisation of the products on the European market.

Our requirements

You have a science degree – toxicology, biology or environmental sciences. Whether you currently work in the industry, at a relevant authority or for a consultancy firm is not a key factor for us. However, experience in the field of toxicology is advantageous. Ideally, you have an additional qualification as an expert toxicologist.

Although your professional expertise is essential, your personality is also a key success factor. Your counterparts are in-house SCC scientific staff, and externally, you will be dealing with national and international clients, research institutions and authorities. Therefore, you must be persuasive and have excellent communication skills in German and English.

We offer you...

Exciting project work in project teams with a regular turnover of members. A good income with profit-sharing and a bonus, benefits in kind such as a company pension and subsidised lunches. Your talent will continue to develop in a scientifically challenging environment. Most of our employees have an academic degree, and many have a doctorate.

There is a good atmosphere here. People know and value each other; we treat each other informally and almost like family. We don't just pay lip service to individual employee support; we actually practice it. Flexitime is long-established.
